

Comprehensive Nutrition for Growing Minds and Bodies

GoKids® Student Formula is specially designed to meet the unique nutritional needs of children and adolescents aged 6 to 18 years. It supports both physical and cognitive growth, helping to ensure healthy development and overall well-being. Packed with brain and body-boosting nutrients like DHA, Lutein, Zinc, B Vitamins, and L-lysine, this formula provides a complete nutritional profile to fuel your child's body, enhances concentration, and maintains alertness throughout the day.

Fuelling Young Minds: Brain Development & Focus Support:

Strong Support in Brain Development & Cognitive Function

High level of DHA supports brain development and cognitive function, which is particularly important for children during school and study hours.

Strong Immune Support, Gut Health & Digestion

A balanced combination of Prebiotics and Probiotics promotes a healthy digestive system, ensuring better nutrient absorption, keeping children healthy, and reducing sick days.

Optimal Growth & Bone Health with L-lysine

An essential nutrient that supports tissue growth and repair, ensuring children develop strong bones and muscles during their adolescent years.

Sustained Energy & Vitality

A strong boost of B Vitamins to keep students energised and alert throughout the day.

Eye Health & Vision Support

Lutein provides key nutrients that help maintain healthy vision, which is especially important during extended periods of screen time due to digital learning.

DHA

DHA is an omega-3 fatty acid and a fundamental component of the cell membrane. It is a key building block for brain and eye development.

VITAMIN A

Reduces the risk of acne, supports bone health, and promotes cell growth.

VITAMIN B

Vitamin B complex supports energy production and overall development in children, promoting memory and concentration.

VITAMIN D

Maintains bone health, helps the body absorb dietary calcium.

PROBIOTICS

Probiotics can help restore beneficial gut bacteria, maintain digestive and immune system health.

PREBIOTICS

Supports gut health, may ease constipation and may improve mineral absorption.

ZINC

Zinc is necessary for normal immune system function and cell division.

PROTEIN

Helps with tissue building and repair. Contributes to the growth of muscle mass.

CALCIUM

Calcium is essential for healthy bones and helps prevent osteoporosis.

LUTEIN

Promotes eye health and improves cognitive function.

L-LYSINE

An essential amino acid that may assist with growth, tissue repair, collagen formation and calcium absorption.
